

## Ease & Accessibility

How might we present easily accessible well segregated on-demand video classes, which can be revisited and started from exactly where the student left during his/her last visit?

Create a student account library.

Create a carousel link on home page of the recently visited videos

chronologically arranged section-wise topics on video page. Indicator to mark which topics are already viewed

Apart from the video classes we can provide a link for listening to audio only in case of slow internet

## Motivated Learners

How might we provide genuine motivation to students which will push them towards their goal

target & progress report

Comparison with toppers

Improvement report

Excellent performance leads to credits which could be used to buy more lessons/quizzes

## Quick Class Notes

How might we provide hassle-free options for downloading pdf materials of the lectures, and tests solutions?

a download button on the video of the lecture itself

A resources tab below the video.

where the pdf for the lecture and related test solutions could be downloaded

A pdf library accessible from bottom menu

## Technical Difficulty

How might we provide hassle free and secure account access?

Login & signup same

through mobile Otp : resend otp option

Logout accessible easily

Carousel for recently watched videos.

## Query Resolution

How might we provide effective & prompt query resolution to the students, which are also regulated and corrected?

1:1 resolution : Direct chat window with the teacher which opens by clicking on their profile name below the video.

comments section under the video works as student's forum.

Teachers can review the answers and star-mark good/best answers

Flag option for derogatory or futile comments

Live query resolution

Comment section tab below the respective video, toggled with lecture details.
